МАОО СОШ № 1. г. Сысерть

The youngest school of Sysert

School № 1 of Sysert was built two years a
It opened its doors on the 1st of September, 20

Our school is a modern three-storey building of a typical design. It is situated not far from the center of Sysert.

In front of our school there are spots grounds and a big stadium, where all the students can play football, basketball or tennis. In winter we ski and skate there. On the other side of the school there is a nice wood. We like to go for a walk there.

There are different specialized classrooms for the lessons of Physics, Chemistry, Geography and Biology. They have slide projectors; schemes and tables are on the walls. Chemistry and Physics classrooms have special laboratories well equipped for different experiments and tests, which are made by pupils during the lessons.

You can see different pictu maps, diagrams and wall newspa on the walls.

On the second floor there is gymnasium and assembly h where we usually gather to celeb different holidays. We decorate assembly room with colou balloons, slogans and our pictures

The canteen and the cloak-room on the ground floor. Our schoo very clean and light. The corrid are large and full of sunlight. Th children can have some rest betw our classes or just talk with e other.

We like our school very much!

Sport news

We are the winners!

Tourist rally of teachers of Sysert urban region is held annually and is always a great autumn holiday, devoted to the Tourist Day. Teachers-tourists come here for 33 years. According to participants, they do not have any problems either before the start or during the sport competitions.

On September, 27 13 teams gathered together on the glade not far from Potopaevskii source. They had to overcome many challenges. Teachers competed in different skills. They set up a tent, determined minerals, plants and azimuth, knitted the complex knots, kindled a fire and boiled water.

Our PE teacher Alexander Lyukhanov took the 2nd place in short walking distance. The team of our school won the team competition. The struggle over who will come to the finish first was an exciting spectacle for all participants!

We are proud of our sporty teachers!!!

Cross of the Nation - 2016

The weather on that day was really splendid! A great number of people (among them students from different schools of Sysert urban region) took part in annually important sport event.

Our schoolmates Yana Ilina (8A) and Alexandra Virfil (9A) won prizes in different races.
We are for healthy way of life!

My native land

Sysert

(named after the river Sysert) is situated 30 km south from the city Ekaterinburg. It spreads on steep slopes covered with coniferous forest of the deep valley of the river Sysert, and on the banks of ponds at the foot of Mt. Besenkovaya.

This mountain and Sysertskii pond are the main sights of the local landscape - from the upper part of the mountain a spectacular panorama of the city and the river valley opens before us. Mt. Besenkovaya is the highest peak in the area. At its base the first buildings of the Sysert metallurgical factory were built. On the peak and slopes, signs of primitive men were found - among them bronze bird idols – similar to those found on the top of Mt. Azov near the town Polevskoi, arrow-heads and stone boomerangs.

The first settlement was based here in 1732, in connection with construction the metallurgical factory on the river Sysert. The raw material (iron ore) for the factory was sent from the deposit, discovered by peasants from the village Aramilskaya Sloboda in 1680. The factory's location was chosen directly by William de Gennin - an engineer and artillery general. He found this convenient place for a future factory at the confluence of the rivers Sysert and Chernaya in 1731.

For a long time Sysert was the central administrative department of the Sysert mountain district, including the following metallurgical factories – Sysertskii, Polevskoi, Severskii, Verkhnesysertskii, and Ilinskii. Sysert was originally planned and built by Alexey Turchaninov (famous salt producer and merchant in the Urals) in 1779—a monument of the architecture of the 18th century.

Two notable buildings - the Church of Saint Simeon and Anne and Turchaninov's house are located in the factory square on the bank of the Sysertskii pond, where different holidays are often celebrated.

Sysert is "washed" by lakes - Big Sysert from the south and southwest, Small Sysert and Ilinskii from the east. Big Sysert is located within the town limits and includes three gulfs: in the north, Chernovskoi (named after the river Chernaya), in the south, the longest Verkhnesysertskii and the shortest gulf in the northeast. The river Sysert flows from the last gulf. In the lake several species of fish are found - perch, ruff, crucian, small fry, bream (freshwater) and pike. On the northern bank of the lake Mt. Bolshoi Ugor ("Big Hill") raises, and along the western bank stretches Mt. Chernovskoi Uval (named after the river Chernaya) - covered with mixed (pines, birches) forest. Also on the northern bank is the natural monument – the rock "Sivka-Burka" (named after the hero of a Russian fairy-tale).

It is worth visiting!

One of the sights in the region is *Lake Talkov Kamien* - located in a westerly direction 4 – 5 km from the town centre near Mt. Chernovskoi Uval. The lake has an artificial origin - it is an old abandoned talc mine, which was flooded by subterranean waters. Talc schist was mined here by hand in the last decades of the 19th century and was used as a fire retardant material in the metallurgical factories of the former Sysert mountain district.

The town's main tourist attraction is Bazhov's house. Pavel Petrovich Bazhov (1879-1950) is one of the most famous Russian writers. He is widely popular because he wrote many fairy-tales dedicated to the Urals and local craftsmen. The house holds many unique objects of Russian people daily life of the 19th and early 20th centuries. The exhibits include works made by gifted local artists and also kitchen utensils, spinning wheels, weaving loom, Russian sledges and other objects created by anonymous folk craftsmen.

The "Syssertiv Farfor" Porcelain Factory, which now produces porcelain tableware and sculpture, was founded on the basis of «Promcooperator» Guild, existed since 1942. First the Guild manufactured earthenware, but from the late 40-ies it came close to renovation of porcelain industry, which had definite traditions in Sysert' - a small porcelain manufacture existed there as far back as the late 19th - the early 20th century.

At present the enterprise produces decorative sculpture on subjects of folk fairy-tales of the Urals Russian narrative poems and ballads; tea- and coffee-sets, decorative vases. Usually the articles are decorated with underglaze painting, but sometimes overglaze painting is applied. Soft brownish-grey and light blue tones are mostly used in painting. Ornamental concepts are often found in the landscapes of the Urals.

Collections of Sysert' artworks are represented in many museums of the Russian Federation. These articles are rewarded with diplomas of different exhibitions.

Elena V. Vatoropina

Let's get acquainted!

We are classmates! We are from 5B!

This is my family: my mum and my sister. We are in Turkey. We are sitting on the grass in the park. The weather is fine! It is hot and sunny.

We went to Turkey two years ago. It was a brilliant summer! We had a very good time: swam in the sea, and sunbathed on the beach. We often went on excursions.

Polina Abrosimova

This photo was made two years ago. In the photo you can see me, my mom and my friend Sveta. She is my classmate. We are standing near the New Year tree at the school party. We danced, sang songs, played funny games at the party.

Lera Bayankina

In this photo, I am in the forest. My sister, mum and me are gathering mushrooms. My mom took this photo is September. We like walking in the forest. We are a friendly family!

Arina Prosvirnina

My name is Sofia. I am from Russia. I live in Sysert. It is not far from Yekaterinburg. I am eleven years old. My birthday is on the 23d of June. I am a talkative, but serious and responsible person. I like to talk to my friends.

My favorite season is summer. In summer we can swim in the river and play tennis. In winter we like playing snowballs. I am fond of sport. I like playing basketball and volleyball.

My family is big and friendly. I've got mum, sister, granny, uncle, aunt and a cat. I often help my mother about the house. Sometimes I cook tasty cakes. My favourite dish is pizza. I love my family! We like to spend time together.

Sofia Rogozhina

My name is Daniil. I am 11. My family is not very big. I've got a mother, a father and a brother. My brother is small. He is only one. My hobby is collecting cars. I have more than a hundred cars. In summer I help my mother in the garden. She likes to grow flowers very much!

Daniil Chermyaninov

Last summer was very hot in the Urals. I went to the river with my friends Nikita, Kirill and Dima. We swam in the river almost every day. I like to swim very much! We also played different games. We often had picnics. In the evening I read books. I had a good time in summer!
