В пособии собраны контрольные и проверочные работы по одной из базовых для четвертого класса тем - "Сложение и вычитание в пределах 1000". Как и любая другая тема, она требует внимательного осмысления и прочного закрепления.

Многие родители убеждены, что их дети очень хорошо считают, но полностью можно быть в этом уверенными только тогда, когда навык счета доведен до автоматизма. В этом случае ответ к примеру ученик пишет по истечении 3-5 секунд.

На каждой странице даны контрольные примеры для самостоятельного решения. После них справа ученик записывает время, за которое они были решены. Слева обозначены цифры, показывающие идеальное время, удовлетворительное и плохой результат, который должен заставить ученика задуматься. К каждой контрольной приведены примеры для работы над ошибками.

Учителю сложно проверить такое количество примеров. Хорошо, если время, затраченное на решение всей работы, отметят взрослые дома. Чтобы достичь отличных результатов, каждый день надо прорабатывать по одной странице.

Пособие можно использовать в качестве дополнительного материала на уроках математики, а также для домашних занятий.
