

## **The job of my dream**

My name is Titova Sasha. I study in the fifth form. I like painting and I want to be an artist. I draw everything I see around myself. I draw my parents, my friends, my kitten, flowers and other things. I entered art school and began to study painting.

Artists can work in many fields today. They work as designers for advertising agencies or for web design studios. Many designers draw with computer programmes but the skill of drawing by hand is highly appreciated in many design studios. Besides, such job demands not only computer knowledges, but also creative thinking of an artist.
